Travertino Romano wall

FOR THE U.S. MARKET ONLY

Travertino Romano Wall collection shows two different, complementary styles: the classic Travertino Romano, in Cross and Vein Cut style. 3D Ink printing technology enhances the naturalness of the surfaces in synergy with Inkjet patterns and structures.
This technology perfectly balances the detailing, shading and gloss/matt finish of each individual piece, resulting in an extremely natural, authentic look.
3D DORICA STRUCTURE An evocation of historyc Doric columns. The upper section is smoother, created with 3D ink, while the lower section employs a slightly moving pad to simulate the look of chiselled stone. The shadow effect is natural and remains clearly visible in both vertical and horizontal installations.
3D PLI STRUCTURE Triangular section, narrow pitch and irregular peaks. The texture, thanks to the use of a glaze mold and 3D ink, is well-controlled, resulting in a single module without installation direction.

RCUL 40x120 cm - 15 3/4"x47 1/4"
